

Table Of Contents:

- Preface
- Chapter 1. Deuterostomes and Chordates
 - 1.1. A Brief Background
 - 1.2. Deuterostomes and Chordates
 - 1.3. Deuterostome Phyla
 - 1.4. Conclusions
- Chapter 2. Hypotheses on Chordate Origins
 - 2.1. The Annelid Theory
 - 2.2. The Auricularia Hypothesis
 - 2.3. The Calcichordate Hypothesis
 - 2.4. The Pedomorphosis Scenario: Was the Ancestor Sessile or Free-Living?
 - 2.5. The New Inversion Hypothesis
 - 2.6. The Enteropneust Hypothesis
 - 2.7. The Aboral-Dorsalization Hypothesis
 - 2.8. Conclusions
- Chapter 3. Fossil Records
 - 3.1. The Cambrian and Ediacaran Periods
 - 3.2. Crown, Stem, and Total Groups
 - 3.3. Fossil Records of Invertebrate Deuterostomes
 - 3.4. Fossil Records of Vertebrates
 - 3.5. Conclusions
- Chapter 4. Molecular Phylogeny
 - 4.1. Molecular Phylogeny of Metazoans
 - 4.2. Molecular Phylogeny of Deuterostome Taxa
 - 4.3. Relationships Within Each Deuterostome Phylum
 - 4.4. Xenacoelomorpha
 - 4.5. MicroRNAs
 - 4.6. Conclusions
- Chapter 5. Comparative Genomics of Deuterostomes
 - 5.1. Genome Decoding
 - 5.2. Genomic Features of Five Representative Deuterostome Taxa
 - 5.3. Gene Families in Deuterostomes and the Ancestral Gene Set
 - 5.4. Exon-Intron Structures
 - 5.5. Synteny
 - 5.6. Conserved Noncoding Sequences
 - 5.7. Repetitive Elements
 - 5.8. Taxonomically Restricted Genes
 - 5.9. Conclusions
- Chapter 6. The Origins of Chordates
 - 6.1. Evaluation of Hypotheses for Chordate Origins
 - 6.2. The Pharyngeal Gene Cluster and the Origin of Deuterostomes
 - 6.3. Hox and Chordate Evolution
 - 6.4. ParaHox Genes
 - 6.5. Conclusions
- Chapter 7. The New Organizers Hypothesis for Chordate Origins
 - 7.1. Chordate Features
 - 7.2. The New Organizers Hypothesis of Chordate Origins
 - 7.3. Cephalochordate Embryogenesis: Primitive Chordate Body-Plan Formation
 - 7.4. Chordate Features and Molecular Developmental Mechanisms
 - 7.5. The Notochord: A Mesodermal Novelty
 - 7.6. Somites (Myotomes): A Mesodermal Novelty
 - 7.7. The Postanal Tail: A Mesodermal Novelty
 - 7.8. The Dorsal Central Nervous System: An Ectodermal Novelty
 - 7.9. Hatschek's Pit: An Ectodermal Novelty
 - 7.10. The Endostyle: An Endodermal Novelty
 - 7.11. Conclusions
- Chapter 8. The Dorsoventral-Axis Inversion Hypothesis: The Embryogenetic Basis for the Appearance of Chordates
 - 8.1. Spemann's Organizer, the Nieuwkoop Center, and the Three-Signal Model
 - 8.2. Axial Patterning of Deuterostome Body Plans
 - 8.3. Interpretation of the Dorsoventral-Axis Inversion Hypothesis
 - 8.4. Conclusions

- Chapter 9. The Enteropneust Hypothesis and Its Interpretation
 - 9.1. The Stomochord and Other Organs Proposed as Antecedents to the Notochord
 - 9.2. The Nervous System of Enteropneusts
 - 9.3. The Spemann's Organizer-Like System in Hemichordates
 - 9.4. Interpretations of the Enteropneust Hypothesis
 - 9.5. Conclusions
- Chapter 10. Chordate Evolution: An Extension of the New Organizers Hypothesis
 - 10.1. Evolution of Vertebrates
 - 10.2. Evolution of Urochordates
 - 10.3. Conclusion
- Chapter 11. How Did Chordates Originate and Evolve?
 - 11.1. The Three-Phylum System of Chordates
 - 11.2. Mechanisms Involved in Origination of Deuterostome Novelties
 - 11.3. Horizontal Gene Transfer
 - 11.4. The Significance of Gene Duplication in Deuterostome Evolution
 - 11.5. Significance of Domain Shuffling in Chordate Evolution
 - 11.6. The Significance of Structural Genes in Metazoan Evolution
 - 11.7. The Phylotypic Stage
 - 11.8. Conclusions
- Chapter 12. Summary and Perspective
 - 12.1. Summary
 - 12.2. Perspective
- References
- Index
